CONCEPTION ET FABRICATION
DE CONTRÔLES D'ASCENSEURS

Bulletin newsletter

ATT: Elevator maintenance companies.

SUJET: C200H PLC end-of-life.

Dear customers,

Automatisation JRT Inc. would like to inform you that the controllers built in recent years with **Omron C200H PLC** model must shortly be replaced. This model is of high reliability, however, the PLC and its parts supply is now discontinued.

You must therefore foresee to the replacement of your controllers equipped with the Omron C200H PLC.

As a first replacement suggestion, you can obtain and replace the controller by a new **Automatisation JRT inc.** controller model. You can contact us to obtain a detailed quotation.

The second solution is to **extend the controller's life** and update them at a lower cost. We can replace the **C200H PLC** by a recent model and convert the original programming. It is possible to do the replacement yourself. **Automatisation JRT inc.** also offers an on-site modification service at a competitive price.

We strongly recommend you to propose one of these 2 replacement solutions to avoid penalizing your customers by the extended shutdown of an elevator and causing inconvenience to users.

You can contact us by calling 418-871-6016 or by e-mail at asc@jrtinc.com.
